PUBLISHER'S PREFACE.

The history of the undertaking *A. L. A. Catalog* is set forth in the editorial preface which follows. The first edition was, it will be noticed, issued by the Bureau of Education, and by direct action of Congress. Since 1893, however, the Library of Congress, promoted into the position of a national library for the United States, has come to be the logical agent of the government for such an undertaking presumed to be in the interest of American libraries as a whole.

It agreed to publish and distribute this revised edition. As appears from the editor's preface, however, its cooperation has actually gone further than this: it printed also and distributed the preliminary trial lists, and it prepared the material which forms the Dictionary section of the *Catalog*. This it has also reproduced with fuller entries on cards: so that a complete card catalog of the entire 8,000 volumes may be procured from it, at nominal cost, under its system of card distribution.

It did not, however, take direct part in the selection of the books.

Distribution.—A single copy of the *Catalog* complete, in cloth, will be sent free of charge to every library in the United States, and to foreign libraries on the exchange list of the Library of Congress, or making specific request.

Other copies, either of the complete work or of either part, in cloth or paper, may be had by addressing *The Superintendent of Documents, Washington, D. C.*, and forwarding the price below stated (a nominal charge, to prevent waste):

Complete (parts 1 and 2). Price: Cloth 50 cents, paper 25 cents.
Part 1 *or* part 2 separately. Price: Cloth 25 cents, paper 15 cents.

It would have been difficult, if not impossible to print the *Catalog* in the short time remaining for publication before the A. L. A. conference at St. Louis without the energetic efforts of the various members of the Library of Congress staff—especially, if any may be particularly mentioned—of Miss Irene Gibson, Mr. F. Neumann and Mr. W. D. Johnston, who have devoted to it much outside time; or without the prompt and efficient cooperation of the chief of the Catalog division and of his assistants, who not merely prepared but, under the direction of Miss E. A. Runner, proof read the Dictionary section. The preparation and proof-reading has involved the constant services, in addition to the supervision of the Chief, of no less than seven catalogers for the past eight months. Unofficial time has been freely given.

The remarkable speed with which the Public Printer has put the matter into type, on the press, and through the bindery, is due largely to the personal interest of the Foreman of Printing, Mr. C. J. Ricketts, and the ready response of his staff, who have applied freely the vast typographic resources at their command.

NOTE BY THE A. L. A. PUBLISHING BOARD.

The A. L. A. publishing board commends this *Catalog* to libraries and readers with the conviction that, while it may not meet every expectation or requirement, it will be found one of the most useful bibliograpical manuals that have been issued. The editor's preface gives so complete a statement of the purposes of the work, and of the history of the undertaking, that little remains for us to add. To the determined and energetic efforts of the editor and his efficient coadjutors we owe whatever of excellence the work may possess. The delays in the publication have been in the interest of increased thoroughness and completeness of work; especially has it been possible to include many more notes than could have been furnished if the work had been hastened.

The board would like to add emphasis to the acknowledgments expressed in the editor's preface, particularly to the Library of Congress and its librarian, without whose most generous and hearty help the work could not have been published in a form and on terms so advantageous to the libraries and the people of the whole land.

To the many examples of effective cooperation which our association has furnished this may well be added as among the chief.

EDITORIAL PREFACE

At its Boston meeting in 1879 the American library association enthusiastically adopted the proposal of the present editor to prepare and publish a list of about 5,000 of the best books with compact notes indicating scope, character and value, to be known as the *A. L. A. catalog*. It was pointed out that such a list would serve:

1 As a guide to bookbuyers whether for private or public libraries. It is not uncommon for a library to pay some single individual hundreds of dollars for making a list representing merely his individual choice of books, not only on subjects with which he is familiar, but also on the much larger number of which he knows practically nothing. A copy of this *Catalog* would be much more valuable, would be in print instead of ms, and several duplicates could be checked up at trifling cost for getting estimates or other purposes.

2 As a guide to readers in choosing what books they might best take from the library or from their own shelves.

3 As a manual to teach the younger and prompt the older librarians or booksellers in answering most wisely the constant inquiry for the best book on a given subject.

4 To take the place of the printed catalog in small public libraries. The call number of all books in the library could be written in the margin, thus showing at once that the library had the book and where it could be found, while unmarked titles would be the best list for early purchase.

5 As a most convenient catalog for private libraries, by checking in the margin all books owned.

6 As a check list of books read, personal notes being added in margins.

Liberal subscriptions were made for copies and much material was collected when work was interrupted by the editor's absorption in other duties. After various proposals for resuming work, the joint cooperation and finance committees, who had been given full power in the premises in 1884, turned the entire matter over to Melvil Dewey as editor, on condition that no financial responsibility should rest on the association. Owing to lack of means little more was done till the World's Columbian exposition gave opportunity to get out an imperfect first edition without notes. As the notes were to be the chief feature of the *A. L. A. catalog*, the 1893 book was called *Catalog of A. L. A. library*, reserving the other name for a list including the all important notes as guides to readers. By the testimony of the U. S. commissioner of education, who published several large editions, it was of even greater service than anticipated. The books were selected by a committee of leading members of the A. L. A. of which J. N. Larned was chairman, and the cataloging was done in the New York state library under Mrs S. C. Fairchild's supervision, the U. S. bureau of education paying the salaries for much of the office work, as the library was to be

its permanent property at the end of the Columbian exposition of 1893, where the A. L. A. library was exhibited and attracted great attention. The list has been used by thousands of libraries and private buyers as a guide in selection.

In 1894 a committee was appointed, with Mrs Fairchild as chairman, to prepare needed supplements. Progress was delayed by many difficulties, and just as the section on education was to go to the printer, it was proposed that instead of a supplement a new work complete in itself should be prepared as the chief A. L. A. exhibit at the St Louis exposition. This plan was adopted. The New York state library had, in 1889, authorized its director as editor of the *Catalog* to prepare and issue it as a state library publication. Though relieved of publication of the 1893 volume by the cooperation of the Bureau of education, the New York state library continued to gather lists and notes as other duties permitted and when the Bureau of education found itself unable to bring out the revised edition as hoped, the regents of the New York state library repeated their authority to prepare and issue it and secured from the legislature a special appropriation covering part of the expenses.

The American library association having placed in the hands of its publishing board its interest in the undertaking, the board welcomed the assumption by the New York state library of the editorial work, and supplemented the financial provision made by the state of New York by an appropriation of $1,200 (afterwards raised to $1,500) to meet the necessary expense. The board has exercised a general supervision over the work and has determined questions affecting its form and general character. Most important, the Library of Congress agreed to share the burden by printing and distributing it widely as one of its publications, thus giving it a much larger free circulation than would have been possible for a state publication.

General plan. The list includes 7,520 volumes specially adapted to small libraries and those just starting, but suitable also for any public library. Except a few of the most important foreign classics in the original, only such foreign works as are available in English translations are included. While this *Catalog*, when carefully revised, will be the best within the prescribed limits of size and purpose that the combined wisdom of our most experienced librarians and specialists can produce, no editors could hope to make a selection from the vast mass of books of all ages and tongues wholly satisfactory even to themselves.

Best as applied to this *Catalog* means relatively to the general reader. An accurate, interesting and comprehensive statement in untechnical language that is best for a general reader may be mere a b c to a specialist, while the most recent, exact and exhaustive treatise best for a specialist may be the worst for a general reader because too technical to be intelligible. Though a mediocre book has sometimes been chosen because there is nothing better meeting the conditions, it is hoped that nothing untrustworthy or ephemeral has been admitted. Out of print books are omitted unless very important and soon to be on the market again.

Titles have been condensed by omitting unessential words. American importer and price when ascertained are given rather than foreign publisher.

Technical books. Many of the most valuable works proposed by experts have been omitted because outside the scope of this list, which is primarily for general readers and not for professional men or special students, but it includes many tech-

nical books on industries common to most communities, e. g. engineering and engineering materials, sanitation, building, etc.

Adaptation to very small libraries. To make the *Catalog* as helpful as possible to the smallest libraries that can start with only 1,000, 2,000 or 5,000 volumes, in the next edition the 1,000 best to buy first will be marked 1, the 1,000 that added to 1 will make the most useful 2,000 will be marked 2, and those that added to 1 and 2 will make the most useful 5,000 will be marked 5. This does not mean that books marked 1 are better than the others, but merely that they are considered the most useful combination for a library limited to 1,000, and so likewise of 2 and 5.

Classification. The definite purpose of this book is to guide in selecting books, either to read or buy; its form is chosen solely for this use regardless of what may be best for libraries in their own catalogs. For its peculiar use it must be classed by subjects for convenience of both reader and buyer. It was also desirable to allow the printing in separate pamphlets of any classes for which there should be special demand. The *Decimal classification* was chosen because its use was much more general than any other and its adoption would convenience the largest number; because all material for this *Catalog* for 27 years has been kept in this order; and because the New York state library, where the editorial work was done, could not use any other method without much confusion and extra labor.

In cases where several different numbers would be equally correct, that one has been chosen which seemed practically best for public libraries: e. g. Plato and Aristotle are classed in literature rather than in philosophy or political science, where they would go if classed strictly by content instead of in view of their larger use as classical literature; Burton's *Anatomy of melancholy* is put in English miscellany instead of under its specific subject; children's primers and readers are classed in literature instead of in education, as they are chosen for their storybook value and not for their bearing on education. Under some heads a comparatively unimportant book appears because its author's works as a whole are included: e. g. under 701 Schiller's *Essays* æsthetical; under 610 Holmes' *Medical essays* now nearly 40 years out of date.

Proportion by subject. The number of volumes in each main subject is given for the *Catalog* of 1893 followed by like numbers for this book. Numbers in each class cover also a selection of juveniles made by special students of children's reading.

A. L. A. library. The United States bureau of education has the complete collection included in the 1893 catalog as exhibited at the Chicago exposition. Frederick M. Crunden, librarian of St Louis public library, vice chairman of the committee on library exhibit at the Louisiana Purchase exposition, has collected this library of 1904 as an exhibit of a model town library in the Missouri state building. This will probably be retained by the St Louis public library after the exposition closes. The Library of Congress has also bought every book in the list not already in its collection, and the New York state library always buys any books it may lack to make its *A. L. A. catalog* complete. These libraries can be kept up to date by adding or withdrawing books as fast as changes are made. It is expected that many public libraries will start by buying the entire list.

Selection. The following circulars sent by the editor to critics will show the exact plan on which the work was done and make clear what the collaborators aimed to do.

SUGGESTIONS FOR MARKING LISTS

15 November 1902

Tentative lists. The basis for selection in each subject will be the *A. L. A. catalog* of 1893 supplemented by lists of later publications. As presumption will be in favor of books already in the *Catalog*, the main task of selection will lie in the supplementary lists, which are intended to contain all books since 1893 with any claim to consideration. Please feel, however, as much freedom in adding as in striking out titles; for in spite of the care taken in making up the lists, some appropriate works may have been overlooked.

Marking scheme. If critics will use the following scheme in marking lists, it will secure uniformity that will greatly lighten the labor of combining returns for the revised list on which a second criticism will be asked before publication.

PLEASE PUT SYMBOL IN LEFT MARGIN BEFORE TITLE

Symbol	Meaning	Symbol	Meaning
+	Keep	?	Uncertain
++	Keep without fail	+?	Inclined to keep
−	Reject	−?	Inclined to reject
=	Reject without fail	o. p.	Out of print
o	No opinion		

Please note at least briefly the reason for which you reject or incline to reject a book; e. g. out of date (o d), too technical (tt), inaccurate (i), too little demand (d), vicious (v) The abbreviations given in ( ) may be used instead of writing words in full.

Rejection. From the lists are to be discarded:

1 Books out of print, unless still readily obtainable and not replaced by something better, e. g. there is nothing to take the place of the U. S. report of 1876 on public libraries, and it is easily gotten of secondhand dealers;

2 Books superseded by others giving newer information or theories, e. g. those on countries where conditions have changed like the West Indies or Philippines, or on rapidly growing sciences and industries like chemistry and electricity;

3 Editions superseded by those distinctly better for public libraries, but specify preferred edition;

4 Books that for other reasons you believe can be more advantageously replaced by others, noting in each case why you discard;

5 Books that you think have no claim to a place in so limited a list of this character.

Notes. Either formulated notes, rough notes or comments as a basis for notes, original or quoted, whether giving your own estimate or facts useful to a reader trying to choose between different books,

are specially requested, as they will be the most helpful feature of the *Catalog*. As many titles will be annotated as practicable in the short time available for this edition and the annotation completed in a later edition. References to good notes already in print, with criticism of either matter or manner, would be much appreciated.

Among important items for notes are point of view; trustworthiness; scope; characteristics of style (didactic, colloquial, interesting, witty, dry, involved or difficult to follow, etc.); scene; period; class of readers to which adapted.

Edition. If you would retain a book but substitute a different edition, cancel description of edition given and specify preferred edition.

Suggested method. Labor on the lists will probably be minimized by marking first the + + and =; i. e. the two extremes of books positively rejected or included. A rough count of those included then quickly shows whether they must be weeded out to come within the allowance to that subject for 8,000 volumes or whether more may be added.

The labor asked of those who kindly assist in this work will be made as light as possible by furnishing lists ready for quick checking with the symbols above, which with a minimum of work will indicate the critics' judgment and preference.

FINAL REVISION OF LISTS

15 January 1904

The lists submitted for final expression of opinion are made up by the associate editor for selection, Mrs H. L. Elmendorf, special bibliographer of the Buffalo public library, after comparison of votes of specialists and advisory board, often supplemented by reference to reviews or examination of the books themselves.

The estimated quota, or proportion, for each class has been filled in the printed galleys. If you wish to add books, either from the typewritten lists or as new suggestions, please indicate, if possible, what books you would take out in return for those that you would put in.

As this *Catalog* is not a bibliography of the best books from a scholar's point of view, but a list of books most practically useful to a small public library, those out of print are omitted unless still readily obtainable.

Classification. Please do not discard a book suitable for this *Catalog* merely because found under a head where it does not belong, but say why it should be classed elsewhere. Classification of all books retained will be carefully revised.

Notes. Comments of two distinct kinds are asked: those helpful to editors in finally deciding what books to include; those helpful to readers in choosing what books to read. Please add information that you consider important, specially on the following points: preferred editions, with characteristics of more expensive or cheaper editions that should be mentioned in notes; details of type or printing making a book unusually agreeable or tiresome to the eyes; whether reprint from periodicals; index, whether good, bad, or lacking; point of view—whig, socialist, catholic, etc.; scope and purpose; its rank in literature of the subject; marked characteristics of style; scene; period; class of readers to which adapted.

As the time is very short for the work still to be done, please return your criticisms by earliest possible mail. We greatly wish your final opinion, but can not delay work for belated returns.

Notes for future editions. Immediately on publication revision will begin for the next edition, specially in adding desirable notes. An extra copy for marking by the system adopted will be sent to anyone willing to give the editors the benefit of his criticisms. All suggestions made will be so arranged as to insure consideration when the next edition is printed. No one can do a greater service to this *Catalog* than those who point out its faults, except those who show definitely how to improve it. No one can be more keenly alive to its imperfections than those who know it best, its makers.

Acknowledgments. For 26 years the present editor has persisted in his faith that this *Catalog* would some time appear because it was the most important and valuable single book that could be made to aid in the great public library movement. It is fitting to record here acknowledgments to those who have made it possible.

1 To the New York state library, which for 15 years has kept this *Catalog* steadily in view, has borne the heaviest burdens of preparation, and proposes with such cooperation as it can get to continue the work and make each succeeding edition better. This library selected the original lists, digested all returns, wrote all circulars and conducted all correspondence, classed the books by the *Decimal classification*, furnished the majority of the notes and edited all of them, made the index and edited copy for the class list.

Special acknowledgment is due to Walter Stanley Biscoe and Miss Martha T. Wheeler, whose practical experience in book selection and annotation and bibliographic knowledge have made their unflagging cooperation invaluable; and to Miss Elva L. Bascom, who took immediate charge of routine and clerical detail, condensed hundreds of notes from reviews (many of them among the best in the *Catalog*), edited much of the copy, and gave practical advice in formulating plans. That there are not more errors is largely due to her unceasing vigilance.

2 To the Library of Congress for generous cooperation far beyond its original promises. Besides bearing the whole cost of printing and distributing this volume, it printed and mailed preliminary and revised lists, and has made and published card and dictionary catalogs of the whole collection.

The Library of Congress staff throughout the work has cooperated most warmly to secure improvements both in substance and form, and to correct mistakes both in and out of their definite province. The editors and public are under deep obligation for the generous cooperation and warm personal interest constantly shown in this work by the Librarian of Congress and his staff.

3 To Mr W. P. Cutter, librarian, Forbes library, Northampton, Mass., for furnishing expansive classification numbers for the entire collection and for the synopsis of the Expansive Classification which precedes the dictionary catalog. These numbers appear both in the dictionary catalog and on the printed cards of the Library of Congress.

4 To the A. L. A. publishing board for its appropriation of $1,500 towards expenses, for its warm interest in the work, and for authorizing the issue under its auspices, thus recognizing more fully in fact that it represents the cooperation of nearly 300 librarians and specialists, and so is not alone from the New York state library and Library of Congress, but, as its original name suggests, represents the A. L. A.

5 To the 250 collaborators and critics carefully selected from the entire country as best able to advise in their respective fields, who have given without compensation more thought and labor and have contributed more suggestions and notes than could be reasonably expected from men whose days are crowded with important duties.

The makers of the *Catalog* are under greatest obligation to Prof. James Hardy Ropes, of Harvard, whose generous offer to substitute a carefully balanced list on religion for the rough original list was cordially accepted. His list was made the working basis for further criticism, though the resulting list, as was inevitable, varies greatly from his selection.

6 To Mrs H. L. Elmendorf, to whose rare qualifications for this work much of its merit is due. As librarian of the Milwaukee public library and later as special bibliographer of the Buffalo public library she has given so much attention to the needs of the average public library that she seemed best qualified for this important position, which she has so acceptably filled. Her choice of the 7,520 volumes was made from a list of three times that number containing much conflicting opinion. Besides deciding on the books to be included she also gave most valuable aid in furnishing notes and in choosing and revising others from the vast mass of those under consideration.

No man or committee could possibly make such a selection without leaving grounds for criticism from various points of view. In many cases several recognized authorities insisted that a certain book should be added or omitted, while others equally good insisted on just the reverse. The selection editor had all the reasons from both sides before her, in addition to a lifelong and intimate knowledge of public library needs far beyond most of the critics. With rare skill, industry and patience she has made the list after full consideration of pros and cons. In the judgment of those who know most about this catalog and the people for whom it is intended, no one else would have done this work better.

7 To Miss May Seymour, associate editor, to whom the entire executive work was committed. In both 1903 and 1904 she has given not only every working hour that could be taken from other duties but has added evenings, holidays and vacations. After plans were completed the editor left their execution to her, and in 30 years' experience he has never been better satisfied with the performance of delegated duties. Besides her executive duties, she has been constantly and most efficiently active in every department, and her rare skill and devotion to this work have added much to its practical value. To no other person are so great acknowledgments due.

THE DECIMAL CLASSIFICATION

EXPLANATION

The arrangement chosen for the class list of this catalog, as meeting the convenience of the largest number of users, is the *Decimal classification.* By this system the field of knowledge is divided into 9 main classes and these are numbered by the digits, 1 to 9. Cyclopedias, periodicals, etc. so general in character as to belong to *no* one of these classes are marked nought, and form a tenth class. Each class is similarly separated into 9 divisions, general works belonging to *no* division having nought in place of the division number. Divisions are similarly divided into 9 sections and the process is repeated as often as necessary. Thus 512 means Class 5 (Natural Science), Division 1 (Mathematics), Section 2 (Algebra), and every Algebra is numbered 512.

Subjects are arranged in simple numeric order, all class numbers being decimals. Thus 512 Algebra precedes 513 Geometry and follows 511 Arithmetic.

Summaries. The first summary shows the 10 Classes into which all topics are divided. The second summary shows the 9 Divisions of each of the 10 Classes, and is useful as a birdseye view of the whole scheme on a single page. Then follow 10 pages, one for each class, showing the 9 Sections into which each of the 9 divisions of each class is divided.

Index. In the index, subjects are arranged in one simple alphabet, with the class number of each referring to its exact place in the preceding class list. This index includes also synonyms or alternative names for topics and other entries likely to help a reader find readily the subject sought.

LIBRARY OF CONGRESS

A. L. A. CATALOG

8,000 VOLUMES FOR A POPULAR LIBRARY, WITH NOTES

1904

Part 2: Dictionary Catalog

With synopsis of Expansive Classification

Washington
Government Printing Office
October, 1904

EXPLANATORY NOTE

A. L. A. catalog, part 2 (dictionary plan), has been compiled in two forms:

1 On cards including full entries under authors, subjects, titles and other added headings.

2 In the present form with abbreviated titles to serve: (*a*) as an author and title index to the class list (pt. 1); (*b*) as an aid to smaller libraries about to compile a dictionary catalog while using the A. L. A. collection as a basis.

Rules. In the compilation, the A. L. A. rules—Advance edition, 1902, has been followed in *author and title entries.* For *subject entries* the A. L. A. list of subject headings with occasional modifications borrowed from the dictionary catalog of the Library of Congress has formed the chief guide.

References. An attempt has been made to supply cross references correlating allied subjects. Uncertainty in regard to the final selection of titles has prevented a thorough coordination of the latter as well as of many of the subject entries. Omission of some references as well as the inclusion of others which should have been omitted is accounted for mainly by the fact that final decisions in regard to the omission or insertion of certain titles were received after the greater part of the Catalog had been printed. In the brief time remaining it was not possible to carry out all the modifications of subjects and references required by such changes. All *see also* references from subjects under which no titles are found to related subjects are omitted from the book catalog. They are, however, supplied in the card catalog. A full set of the reference cards will probably be printed to accompany the dictionary catalog in card form.

Title entries. Title entries have been made for all books in fiction and drama, and for others whenever the title was one likely to be remembered; also occasionally to supplement subject entries.

Analyticals. Many analyticals and added entries which are indicated on the cards and therefore to be found in the corresponding card catalog were omitted for want of time and lack of space.

Subdivision of subjects. Under names of important countries, as well as under subjects, subdivisions have been introduced to an extent which may seem unnecessary in a catalog of 6,000 titles. It was, however, considered advisable to retain them as a guide to libraries in their further development of a catalog of this collection.

Class numbers. The numbers of the decimal and expansive classifications follow at the end of each title.

Series entries. Series entries have been supplied in all cases, but owing to insertions or withdrawals of titles at the last moment, omissions or other discrepancies may occasionally be noted.

Prices. Prices of books are given under main entries. Variations between parts 1 and 2 in citing the price of a given book may occur. In that case the price given in the class list represents the latest information procurable.

Type. Different classes of entries are distinguished as follows:

(*a*) Main entries: author's name or first word of title in black face.

(*b*) Subject headings: in Roman small capitals.

(*c*) Title references, series titles, etc.: in Roman lower case.

(*d*) Titles and other explanatory words or phrases used in headings, subdivisions of subjects, also the words "see" and "see also" in references, etc.: in italics.

Orders for printed cards. A consecutive number to be used in ordering printed catalog cards from the Library of Congress is placed after the price in each main entry. Following the consecutive number, but separated from it by a slanting line, is placed another number, which indicates the number of copies of the card required for the main entry and all the additional entries suggested on the corresponding L. C. card. Printed cards can therefore be ordered by sending to the Library of Congress a list of the consecutive numbers corresponding to the titles for which cards are desired.

Further particulars in regard to ordering cards for books listed in this catalog can be obtained on application to the Library of Congress, "card section."

THE EXPANSIVE CLASSIFICATION

EXPLANATION

The original feature of the notation is the use of LETTERS to mark NON-LOCAL SUBJECTS and *figures* (from 11 to 99) to mark *places*. This makes it possible to express the local relations of a subject in a perfectly unmistakable way, the letters never being used to signify countries and these figures never being used for any other subjects but countries. Thus 45 is England wherever it occurs; e. g. F being history and G geography, F45 is the history of England, G45 the geography of England. This local notation can be used, not merely with the main classes, but in every subdivision, no matter how minute, which is worth dividing by countries. Whenever one wishes to separate what relates to England from other works on any subject one has only to add the two figures 45. Whenever one sees 45 in the class mark of a book one knows that the book so marked treats its subject with special reference to England. This "local list" by the figures gives marks to the 8 most important countries. The addition of a third and sometimes a fourth figure gives marks for all the independent countries in the world. Parts of and places in countries are arranged alphabetically under each, and are marked either by the usual Cutter order-table, which has initial letters followed by figures, or by a special Cutter order-table composed of figures alone.

The first part of the classification, as published, contains the first six classifications and a combined index to them all. The seventh, the fullest classification, will have ten sections. Seven of them (Philosophy, Religion, Historical sciences, Social sciences, Medicine, Language and Literature, Recreative and Fine arts) are published, each with its own index. When these and the other Generalia (Natural sciences and Industrial arts) are printed, with their indexes, a full index to the whole will be made.

The classification of the books in this catalog has been done by Alida M. Stephens and Albert R. Nichols, under the direction of W. P. Cutter.
